PROFESSIONAL SUMMARY

Spatial Data Science student building scalable applications that solve real-world problems. Proficient in modern web stacks (Next.js, Node.js, Python) and cloud platforms, with experience in full-stack development, AI/ML integration, and geospatial systems. Demonstrated ability to ship functional products from concept to deployment.

EXPERIENCE

Data Analyst ,BrickLabs AI

September 2024 - December 2024

- Executed exploratory data analysis (EDA) that uncovered user behavior trends, contributing to product decisions that drove user growth from 4000 to 11000 active users.
- Automated critical data workflows using Python and SQL, improving reporting efficiency by 30% and enabling the creation of real-time performance dashboards.

Extern, National Geographic Society and The Nature Conservancy

February 2025 - Present

<https://www.extern.com/externships/national-geographic-society-the-nature-conservancy-community-conservation-data-visualization-and-mapping-externship>

- Led a geospatial analysis project applying Object-Based Image Analysis (OBIA) on Sentinel-2 imagery to monitor invasive species over 4,100 km² of Lake Victoria directly producing insights to support actionable conservation plans presented to the Kisumu county government.
- Published interactive ESRI StoryMaps to translate environmental data into compelling narratives for public and professional audiences garnering 300+ views and facilitating stakeholder presentations.

PROJECTS

Co-Founder, Takaconnect

November 2024 - Present

- Developed a waste management android application concept;conducted user research and designed a GIS-integrated dashboard for route optimization and user engagement.

Developer, EFH Innovation Sprint

March, 2025

- Built a RAG-based LLM prototype that improved answer relevance by 22% through prompt optimization demonstrating ability to leverage AI to query research documents.

Dispatch AI ; Emergency Response System

June, 2024

- Developed an AI-powered emergency response backend in Python that triages calls via NLP, integrates real-time GPS and external APIs for automatic dispatch to nearest services, and features a voice-to-text module achieving >87% accuracy on critical keyword recognition.

EDUCATION

The Polytechnic University of Hong Kong, Kowloon, Hong Kong SAR
Bsc Hons, Spatial Data Science and Smart Cities

Expected Graduation: August 2029

Strathmore University, Nairobi, Kenya
Certificate in Data Analytics and Visualization

September 2025

SKILLS

- **Programming:** Python, JavaScript, SQL, Solana

- **Tools and Technologies:** ArcGIS Pro, QGIS, Git, Docker, Kubernetes(basic)
- **Frameworks and Libraries:** Next.js, Tailwind CSS, Node.js, Firebase, API Integration

ACTIVITIES AND LEADERSHIP POSITIONS

Data Science and AI track lead, UON Coding Club ; Soccer and Karate (Green belt)

AWARDS

- **Design:** Innovate Nairobi ESRI Hackathon (2024), Haki Hack (2024), GovStack hackathon (2024),EFH Innovation Sprint(2025),EDU Chain regional hackathon(2025)
- **Certifications:** Emobilis Web Development , Creating Python Scripts in ArcGIS(ESRI) , Artificial Intelligence(ISACA),Going Places with Spatial Analysis(ESRI)

VOLUNTEERING

Kosi Africa

November 2024 - Present

- Promoted educational and sustainability initiatives through nationwide school visits speaking to students at 20+ high schools.
- Supported the “EduGreen” campaign contributing to a drive that planted 5,000 trees and empowered underserved learners.

Event support volunteer, TedX Westland Salon

December 2024

- Executed on-site event setup and venue logistics contributing to a seamless attendee experience for 150+ guests.
- Drove participant engagement by managing the interactive “Curiosity Wall” facilitating networking and dialogue around event themes.
